

This 30m<sup>2</sup> dwelling makes use of a traditional gable, giving you the option to add a high ceiling through the main open plan living. Inside there's plenty of storage built-in, something that's often overlooked in small builds. The bedroom is positioned at the back of the home for privacy, separated by ample storage space. A different shade of timbers or paint can be used in the gable end to personalise this dwelling to your taste.

Floor Area: 30m<sup>2</sup>
